BSV Crane Fork

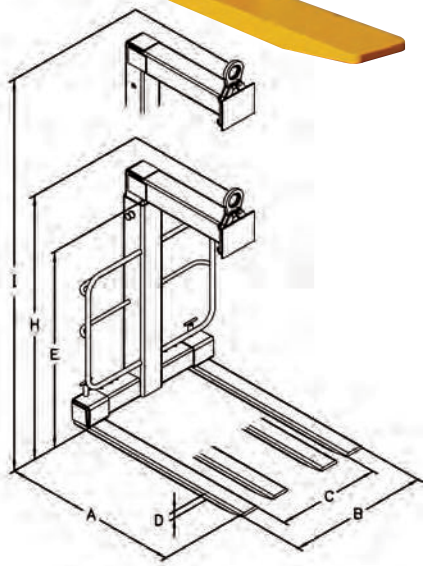
Crane Fork with Clamp Lifting Eye

BSV offers a wide range of crane forks with a clamp lifting eye. The clamp enables the crane operator to lift the pallet fork in precisely the correct position whatever the situation. The clamp system is the safest and most flexible solution for transporting palletised goods where the point of gravity varies between loads.

All BSV crane forks are designed and manufactured to give maximum strength and rigidity with a low unit weight.

A BSV crane fork with clamp lifting eye offers many advantages, especially in terms of safety and durability:

- Adjustable lifting point for loads with varying centres of gravity
- Manufactured in high grade steel
- Extremely strong and durable
- Low unit weight combined with a strong, rigid design
- High safety factor
- Quick and easy adjustment of free height and fork separation
- Handles are located well clear of the load for added safety
- Various fork dimensions can be fitted
- Individually load tested on a computerised test-bench



BSV crane forks can be mounted on a wide variety of cranes and gantries. Different suspension linkages are available to suit all types of crane.

Crane Fork with Clamp Lifting Eye

Type	A mm.	B mm.	C mm.	D mm.	E mm.	H* mm.	I* mm.	K mm	Weight kg.	Max load kg.
PG 100/2 SSB (Pipe Forks)	970	400-950	200-750	40	1270-1900	1700	2330	500	145	2000
