

BSV KS II Grain Grab

BSV grain grab is manufactured in high quality and is designed to be used primarily for grain and rapeseed, but also for handling, for example, floating layers, wood chips, etc.

The grab is equipped with special blades so that it closes tightly when handling grain and rapeseed and at the same time does not damage the tarpaulin substrate.

BSV's KS grabs are equipped with a built-in check valve inside the cylinder, which means that the load is retained even if a hose on crane breaks.

This grab is available in different sizes, which are 1.000, 1.500 or 2.000 liters. The grab can be mounted with rotator and suspension according to the crane.

When you need to get ready for the harvest season, BSV will be happy to help you with the right grain bucket for your crane.

BSV Grain Grab types

Specification / Type		1000	1500	2000
Volume	L	1000	1500	2000
Grab width - closed	mm	1440	1720	1960
Grab width - open	mm	2280	2560	2800
Length of grab blade	mm	1500	1500	1500
Height - closed	mm	1030	1170	1290
Height - open	mm	820	975	990
Unit weight	Kg	470	540	550
Item number		21-KS-00-224070	21-KS-00-224094	21-KS-00-224094-1
