

BSV grab type RB

BSV also develops and manufactures scissor grabs for lifting pipes in various sizes and materials. It can, for example, be concrete pipes, PVC pipes, paper rolls, etc.

BSV mechanical scissor grabs are all equipped with a patented pawl system that ensures 100% automatic work, also called "every second time automatic". It means that it grips every second time and releases every second time when operated by the crane operator.

BSV offers this type of scissor grabs in many different sizes. The grabs are available in a standard range as well as asymmetrical versions.

The grabs are equipped with replaceable rubber pads or steel jaws depending on the type of grab and the kind of material, the surface and working and climatic conditions.

Type	Span outside tube. mm	Unit weight, kg	WLL, kg
RB 15/25	216-365	25	250
RB 20/30	250-400	50	500
RB 30/40	390-550	65	550
RB 40/50	510-650	85	900
RB 50/60	630-810	120	1600
RB 60/80	750-1020	220	2200
RB 80/100	960-1300	360	2850
RB 100/120	1200-1480	530	4800
RB 120/140	1460-1750	715	5000
RB 140/160	1720-1980	1000	6500

All measurements are in mm and weight is in kg.
